

HOW DOES COUNTERINTELLIGENCE WORK?

Monitoring for *physical, cyber, and public image* threats

THREAT INFORMATION ENGINE

A **custom-programmed** system that scrapes both Darknet and Clearnet.

Searches for client and industry **mentions** on social media.

OPERATIONS TEAM

Works closely with clients to **avert** catastrophic **damage** with negligible loss of time and revenue.

Continuous monitoring until threat changes.

INDICATIONS & WARNING TEAM

Monitoring both **Clearnet** & **Darknet**.

Industry and client specific.

VIP ID **monitoring** and **protection**.

RESEARCH TEAM

Investigates new **threats** entering the global landscape.

Researches new **exploits**, **ransomware** and **malicious** code.

CUSTOM REPORTING

Correlate, validate, and analyze incoming data, turning it into actionable **threat intelligence** with context.

Include courses of **action** for dealing with those threats.
