

SMALL TO MEDIUM SIZED BUSINESSES AND CYBERSECURITY

A LANDSCAPE RIPE FOR HACKERS

Small and medium sized businesses (SMBs) are the perfect target for a cyberattack. Often with limited IT staff without advanced cybersecurity training, and outdated antivirus software, SMBs might not even realize they are targets. The stats below show exactly how large of a threat cyberattacks can be to SMBs, and why proactive measures are crucial to staying safe.

60%

OF CYBERCRIME IS DIRECTED AT SMBs

82%

OF SMB OWNERS DON'T THINK THEY ARE TARGETS

60%

CLOSE THEIR DOORS WITHIN 6 MONTHS OF A CYBERATTACK

3/4 say they don't have a sufficient IT staff to cover cybersecurity

\$3M average cost of a cyberattack to a business
