

Binary Defense Differentiators

In the flooded market of cybersecurity vendors, it's important to see where your provider stands out above the competitor. Binary Defense uses a human-driven, technology-enabled methodology with our MDR offerings and open XDR approach.

The Attackers-Mindset

Detection and response strategies from the attacker's perspective, anticipating their moves to create proactive defenses that give you a decisive advantage.

Detections Tailored to You

We tailor detections to your specific environment, delivering precise alerts that align with your business goals and reduce false positives.

Security That Sticks

Our personalized detection rules and tuning stay with you, ensuring ongoing protection and continuous security improvements.

Disrupt the Disruptors

Combining managed deception and advanced attack disruption, we proactively stop threats. With seamless updates to threat intelligence and detection logic, we ensure continuous protection and optimal security outcomes.

Pay for Outcomes, Not Just Data

Flexible pricing tailored to the complexity of your security needs, ensuring you pay only for the investigations you require.

About Binary Defense

Binary Defense is a trusted leader in security operations, supporting companies of all sizes and industries to proactively monitor, detect and respond to cyberattacks. The company personalizes a Managed Detection and Response solution, including advanced Threat Hunting, Digital Risk Protection, Phishing Response, and Incident Response services, helping customers mature their security program with confidence.
